PROFESSIONAL SUMMARY

AI & Data Science undergraduate with a strong foundation in Python, SQL, Machine Learning, and Data Analysis. Hands-on experience building data-driven projects and working with Python libraries including Pandas, NumPy, Matplotlib, Seaborn, and Scikit-learn.

EDUCATION

B.Tech – AI & Data Science, AISSMS IOIT (Present - 4th sem) | SGPA: 8.79(4th sem) | CGPA :8.50

Diploma – Computer Engineering, Government polytechnic Murtizapur (2022–2025) | 91.54% SSC,
Shri Narsing Vidyalay Akot (2022) | 90.40%

KEY SKILLS/TECHNICAL SKILLS

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Machine Learning, EDA

Languages: Python, C, C++, PHP, HTML

Database: MySQL, SQL, Database Management

Tools: Git, GitHub, VS Code, Jupyter Notebook, Excel **Core**

Concepts: OOP, Data Structures, DBMS

Soft Skills: Communication, Leadership, Problem Solving, Teamwork

INTERNSHIP

Data Science Intern | Oasis Infobyte (OIBSIP)

- Completed five industry-oriented Data Science projects using Python and Machine Learning.
- Applied data preprocessing, exploratory data analysis (EDA), data visualization, Machine Learning, and Natural Language Processing (NLP) techniques on real-world datasets.

PROJECTS

Lost & Found Management System | PHP | MySQL | HTML | CSS | XAMPP

- Created a simple web application to help users record and find lost or found items. Used PHP and MySQL to store item details and manage records through the application.

Website Performance Analytics | Python | Pandas | NumPy | Matplotlib | Seaborn

- Explored website data such as visitors, page views, bounce rate, session duration, and conversions. Created visualizations to understand user behaviour and identify patterns affecting website performance.

Car Price Prediction | Python | Scikit-learn | Machine Learning

- Built a Machine Learning model to estimate car prices based on different vehicle features. Worked on preparing the data and selecting useful features before training the model.

Email Spam Detection | Python | NLP | Scikit-learn

- Built a model that classifies emails as spam or non-spam based on their content. Used basic text preprocessing and NLP techniques to prepare the email data for classification.

CERTIFICATIONS

- Python Programming: Ai Adventures
- IoT (Internet of Things): MDB-Electrosoft
- Data Structures & Algorithms (DSA): Udemy Certified
- MySQL: Udemy Certified
- Oasis Infobyte – Data Science Internship
- PHP: VJ-Tech Academy

LEADERSHIP & ACTIVITIES

- Katalyst Scholar
- Training & Placement Committee Member
, AISSMS IOIT
- Katalyst Volunteer
